

FORKLIFT TRAINING SYSTEMS

FORKLIFT TRAIN-THE-TRAINER PROPOSAL

(OPTIONAL DAY FOR MOBILE ELEVATING WORK PLATFORMS)

Dave Hoover

President

740-763-4978

dhoover@forkliftrainingsystem.com

www.forkliftrainingsystems.com

"Whatever you do, work at it with all your heart, as if working for the Lord, not for men." Colossians 3:23

CLASS FEATURES:

- ✓ Two full days of training, which will both educate and inspire trainers.
- ✓ Trainer's credentials do not expire and can be used anywhere in the U.S.
- ✓ Trainers learn how to identify, prioritize and correct forklift hazards.
- ✓ Trainers receive full documentation of their training credentials.
- ✓ Trainers get to see how world class forklift operator training is conducted.
- ✓ Live "on truck" exercises, set up sample courses, discuss hands-on evaluations and practice operation.
- ✓ Includes instruction on your specific forklift types. We can cover counterbalance, narrow aisle reach, elevated order pickers and pallet jacks and possibly other types if desired.

WHAT SETS OUR TRAINING APART?

- ✓ Trainers will "earn" their certification and must prove their ability in a pass/fail class format.
- ✓ Trainers are tested on their knowledge of the OSHA standards and their ability to identify and communicate forklift safety hazards.
- ✓ Trainers depart from class with confidence, knowing what to do, how to do it. They will have the skills and materials to conduct OSHA compliant training.
- ✓ Trainers have a support system in place. If they have a question or need advice, we'll be here for them.

TRAINER'S CLASS COMPARISON

	Forklift Training Systems	Other Providers
Are trainers tested to ensure they meet the requirements for trainers per the OSHA standard?	YES	Most provide no testing to the trainers.
Are classes conducted on a pass or fail basis to ensure trainer quality and competency?	YES	No, everyone passes, regardless of competency.
Do trainers take part in an operator training class to ensure they've seen the right way to conduct effective and inspiring training?	YES	Many providers add a few extra hours to their operators classes and call it a trainers class
How long is your forklift trainer's class?	18 hours in two full days.	Usually 5 to 7 hours.
Do you have an option to cross train trainers on aerial work platforms (boom and scissor lifts)	YES, optional third day dedicated to AWP's	Combination classes are very rare.
Can you bring the class to our site anywhere in the U.S if we have four or more trainers? Do you have regularly scheduled classes?	YES, nationwide coverage and regular classes in the Midwest monthly .	Forklift dealers don't have nationwide coverage.
Can you provide a complete training kit for sit sit down, reach, picker and pallet jack, including all materials needed to train indefinitely.	Yes, kits cost \$165. On site trainer's classes get their kit at no charge.	Materials kits can cost \$400+, be sure to ask about this in advance.
Does OSHA require periodic refresher training for trainers? Does your company put an expiration date on trainers?	NO, in both cases. You can return for a refresher but that is your choice.	Most have three year expirations, just like operators.
Do you stay in touch with trainers after they leave the class?	YES, we send out periodic trainer's updates.	You will only hear from them when you expire.

DAY ONE AGENDA:

- ✓ Introduction – Trainers receive an overview of the Forklift Training Systems' approach to training. Trainees introduce themselves and discuss their goals for the class.
- ✓ Trainers participate in a sample operator training classroom session, complete with written exam and discussion. This unique experience gives the trainee a chance to see world class training conducted with a high level of expertise and professionalism, so they can model their future training after it.
- ✓ Trainers present information from their facility survey, including an open discussion of strengths and weaknesses and how to prioritize fixing current problems.
- ✓ Additional forklift types and their unique hazards and issues.
- ✓ Set up a sample hands on evaluation course and explain how to conduct pass/fail driving evaluations. Discussion of practice operation for new operators.

DAY TWO AGENDA:

- ✓ OSHA and legal issues surrounding forklift training including:
 - Review test on the OSHA forklift standard.
 - OSHA forklift standard, General Duty Clause & Letters of interpretation.
 - Safety audits – Identifying and removing material handling hazards.
 - Risk management, protecting yourself and your company.
 - Site and equipment specific training requirements.
 - Certification requirements and recommended policies.
 - Supervision, discipline and positive rewards for operators.
 - Discussion of personal liability for supervisors and trainers.
- ✓ Motivating people to work safely. Discuss the physical and emotional affects accidents have on workers, families, coworkers and companies.
- ✓ Teaching pedestrians how to work safely around forklift operations.
- ✓ Tips for organizing and conducting great training for adults.
- ✓ How to utilize the OSHA web site effectively for research and information.
- ✓ Review of materials provided to trainers and ongoing support from our company.
- ✓ Wrap up, final questions and class evaluation forms for those not attending day three.

OUR CUSTOMERS INCLUDE:

Aleris
Ashland
Associated Materials
C&W (Amazon)
Continental Structural Plastics
Dexter Axle
Emerson Network Power
GE
Glatfelter
Jefferson Industries Corporation
Kellogg

Whirlpool

OUR FORKLIFT DEALER PARTNERS:

All-Lift Services (Willoughby)
Buckeye Valley Forklift (Mt. Vernon)
Buckeye Forklift and Equipment (Columbus)
Builders Exchange of Central Ohio (Columbus)
Central Ohio Forklifts (Columbus)
Direct Forklift (Youngstown)
Harr's Forklift Service (Columbus)
Hy-Tek Material Handling (Columbus)
Straight Up Equipment (Columbus)

When evaluating Train-the-Trainer programs, be sure to ask the right questions!

- How long is your class? **One day classes are too short to properly train a trainer.** With breaks and lunch, many classes provide as little as 5 hours of instruction, which is barely enough time to train and operator, no less a trainer! Shortcutting the quantity of instruction creates trainers who are little more than video tape inserters.
- What materials do we get free with your class, what materials will we need to purchase and how much will they cost? **Don't find out the hard way, you have \$500 in videos/materials to purchase for your trainers to be properly equipped.** If you have several types of trucks, such as sit down, stand up reach, man up order picker and walkie pallet jacks, you will need even more materials. Be sure you are getting what you need and you know the costs.
- How will you keep our trainer up to date on the everchanging OSHA standards and interpretations? This is an important question since things change all the time. **Beware of suppliers which have no formal system in place to update your trainer as time passes.** We stay in touch with trainers through our periodic newsletter to keep them up to date on industry trends, recent accidents and changes in the standards.
- Will our trainer expire and have to attend the course again at some point? **OSHA does not have an expiration date for trainers; if a supplier puts an expiration date on your class it is because they want your money again.** Continuing education is great for trainers, but you should not be forced into it on any particular time frame; it should be the decision of your facility and your trainer when they need updates.

CONSIDER THIS...

“It’s unwise to pay too much, but it’s worse to pay too little. When you pay too little, you sometimes lose everything, because the thing you bought was incapable of doing the thing it was bought to do. The common law of business balance prohibits paying a little and getting a lot – it can’t be done. If you deal with the lowest bidder, it is well to add something for the risk you have run, and if you do that you will have enough to pay for something better.”

John Ruskin (1819-1900)

OSHA Forklift Trainer's Requirements: OSHA 29CFR1910.178 (I) (2) (iii)

All operator training and evaluation shall be conducted by persons who have the knowledge, training, and experience to train powered industrial truck operators and evaluate their competence.

Additional OSHA Comments: OSHA Compliance Directive: CPL 2-1.28A

An example of a qualified trainer would be a person who, by possession of a recognized degree, certificate, or professional standing, or who by knowledge, training and experience, has demonstrated the ability to train and evaluate powered industrial truck operators.

Click on the icon below to view a three-minute video about our forklift trainer's class.

Course Description:

This action packed; two-day course provides trainers with practical experience. Trainers leave with confidence; ready to return home and instruct operators, pedestrians and management on improving forklift safety. Train-the-trainer is an excellent option if you want to save money, need training flexibility, have unique equipment or significant employee turn-over. This will be the best safety training your people have ever attended; bar none.

Class Materials:

Each company receives the following materials for only \$165:

- ✓ USB with over 115 documents and video clips.
- ✓ Sit down rider training kit, including a 56-minute USB
- ✓ Narrow aisle training kit for stand-up reach and order pickers. 35-minute. USB
- ✓ Pallet jack training kit. 20-minute. USB
- ✓ Trainer's guide, operator's guide and written tests for all above kits in pdf format. PowerPoint presentations for all the above truck types.
- ✓ Refresher video for experienced operators. 11-minute USB
- ✓ Only one kit is needed per facility. Provided at no charge with on-site classes.

Pricing - 2 Day Forklift Trainer's Class

1 Trainer = \$750

2-3 Trainers = \$700 per trainer

Click below to view all upcoming dates or register for any Columbus Ohio class.

Need 4 or more trainers? Our flat rate of \$3,000 includes up to 10 trainers at your site, including one free set of training materials. Minor travel charges will apply outside of Ohio. We will bring our class directly to your facility; saving you time and money. Call us today at 740-763-4978 to set up an on-site class around your busy schedule.

OPTIONAL THIRD DAY FOR MOBILE ELEVATING WORK PLATFORM TRAINERS (Scissor and Boom Lifts):

DAY THREE AGENDA:

Do you currently have a program in place for training mobile elevating work platform operators? Many companies don't and the ANSI standards were recently updated in December of 2018. Add a third day and cross train your people for only \$300 per trainer. On site classes can add this additional day for up to ten trainers for only \$1,500.

- ✓ Sample mobile elevating work platform operator training classroom.
- ✓ Hands on time covering pre shift inspections, use of ground controls and actual operation of the lifts, depending on the needs and requests of each trainer.
- ✓ Review of mobile elevating work platform surveys completed by each trainer.
- ✓ Cover regulations from OSHA and ANSI (recently updated).
- ✓ Fall protection rules as they apply to aerial work platforms.
- ✓ Industry best practices.
- ✓ Risk management and injury statistics.

RE: David Hoover
Forklift Training Systems

Dear Dave,

I wanted to take a moment to express our appreciation to you and your team. The Two-day Forklift and One-day Aerial Lift Train the Trainer class exceeded our expectations. The feedback from the participants in our group stated, "The class was the best they have ever attended." Some of the participants have been trainers for over ten years.

Your trainer was very knowledgeable and answered every question from the team. His answers were not from personal thoughts, he backed it up with standards, which placed the confidence of the team in the trainer to a higher level. I cannot express how well the trainer conducted the training and how he managed the time. This is not my first time working with Forklift Training Systems. Each time, with two different instructors, proved to be second to none. Thank you for a job well done!

Sincerely,
Bryan Webb
