CUSTOMER EXPERIENCES:

"I feel much better about the responsibility I'm taking on having been through your class. You have a world-class operation going there. I wouldn't hesitate to recommend your company to anyone who needs to get up to speed on this material."

- ***General Electric***

"All of my guys walked away VERY pleased (they are a tough crowd) and newly energized to start making our site a better, safer place to work. Your program provided accurate, "real world" material that we can put into play immediately."

- ***BASF***

"The training content you designed was more extensive than other training vendors and it ensured that our managers would not only be prepared to train their operators, but provided skill training in how to change behavior. Requiring that students pass the pre and post testing did its job in making sure the training was taken seriously, as it should be."

- ***CES (City Electric Supply)***

"We have partnered with Forklift Training Systems for over 20 years on training. You have supplied us both locally and across North America with great quality trainer training. Any time we have needed help you have met and greatly exceeded our expectations."

- ***The Scotts Company***
